THREE YEARS · SCORE ATTAINMENT

The high-score pool has expanded

Comparable cohorts, not comparable raw candidate counts: percentages are normalised to each year's number of exam takers.

Who reached 60, 70 and 80 points?

Actual counts · cohort-normalised percentages

60+ /90 points

Share of all candidates • axis max 30%

70+ /90 points

Share of all candidates • axis max 10%

80+ /90 points

Share of all candidates • axis max 1.25%

01 / SIGNAL

28.41%

Scored 60+ in 2026, versus 11.23% in 2025.

02 / COMPETITION

2.89×

The share of candidates above 70 compared with 2025.

03 / TOP TAIL

177

2026 candidates with 80+; 2025 had just 54.

2024: published counts above each threshold (strict >). 2025 and 2026: counts at or above each threshold (≥). The threshold boundaries therefore differ slightly. Population sizes: 10,931 / 13,506 / 18,368. Do not interpret a cohort-wide share as an EU- or Non-EU-specific admission percentile.

2026: the finer 5-point score profile

Only 2026 has all individual net scores available for a comparable fine histogram

The 2024 60/70/80 thresholds are strict "greater than"; 2025/26 are "at least". Band membership on the exact boundary may vary slightly. A 2024 or 2025 national 5-point histogram cannot be reconstructed faithfully from three cut-points, so it is not invented.

SECTION PERFORMANCE · 2024 TO 2026

Which sections really changed?

A high total score can mask falling performance in other subjects; compare every section on its own score maximum.

2024	2025	2026
42.16 mean points /90	40.52 mean points /90	49.29 mean points /90

Average net score by section

Same section maximum used for all years · each bar scales to its section's maximum

+11.68

Biology is the biggest contributor to the change.

Reported mean Biology scores rose from approximately 14.11 in 2025 to 25.79 in 2026. This is larger than the +8.77 change in the total mean, because reasoning and chemistry moved in the opposite direction.

2024 section means are from the previously provided IMAT Portal report. 2025 section means are approximations reconstructed from rounded subject percentages and are not accurate to 0.01 points. 2026 means are calculated from 18,368 anonymous score records. Raw cohort mean differences do not isolate subject difficulty from cohort selection.

What predicts a cutoff?

Score distribution + Eligible cohort + Seat allocation + University preference

Anonymized scores alone do not show who selected each university. The specified 2026 ranges are scenarios, not statistically calibrated confidence intervals.

Data quality notes

The supplied 2025 Messina mean (57.80) is below its listed cutoff (58.20), so the source definitions or cohorts may differ. Figures are kept as provided rather than silently altered.

Historic Top% benchmarks are user-supplied, not independently recalculated nationwide empirical CDFs. The 2024–2026 score-band bars are based on separately sourced anonymous-results counts.

- **Q19 · bacterial transformation** — mockexam2 Q31
- **Q34 · Cu + HNO_3 balancing** — tolcmed2015 Q44 / tolcmed2019 Q46
- **Q46 · isothermal gas law** — mockexam1 Q51 / imatmosi Q54
- **Q58 · without-replacement probability** — mockexam1 Q55 / mockexam2 Q50
- **Q14 / Q25 / Q26 · cell biology** — Repeated across IMATMOGI and TOLC-MED sets

A CLOSED-LOOP PREPARATION SYSTEM

Built to turn mistakes into targeted practice

1 · Learn
Science Hub, formula books and worked examples establish the model.

→

2 · Drill
Timed topic sets build speed and expose weak retrieval.

→

3 · Diagnose
Error-log analytics identifies recurring distractors and knowledge gaps.

→

4 · Stress-test
Full mocks rehearse pacing, skipping and score conversion under pressure.

Why this matters for 2026: Direct-hit examples are useful, but the larger advantage comes from recognising the same mechanism when the wording, variable names or context changes.

2027 PREPARATION BLUEPRINT

Condensed from the longer Meditaliano curriculum tracks

Foundation
Biomolecules, stoichiometry, algebra, cell structure and mechanics.

Integration
Respiration, genetics, physiology, equilibrium, circuits and probability.

Battle phase
Timed past papers, 85-minute mocks, skip discipline and final error-log review.

Build pattern recognition before exam day.
