ROME · CASALE SAN PIO V

# STUDY MEDICINE IN THE HEART OF ROME.

**A historic campus. Contemporary medical education. Two routes designed to move international students from preparation to clinical ambition.**

## YOUR MEDICAL FUTURE, BUILT IN ROME.

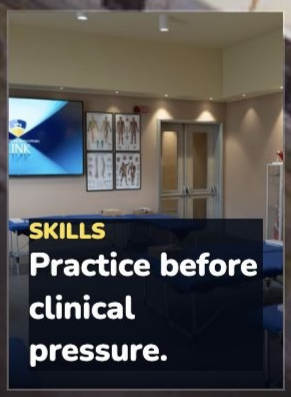

Choose the English-taught Foundation Year or compete for the six-year Medicine and Surgery degree. This guide shows the campus, learning experience, curriculum, admissions path and investment.

CASALE SAN PIO V
Historic Rome campus.

MEDICINE
A six-year professional path.

SKILLS
Practice before clinical pressure.

### MEDICINE IS ITALIAN-TAUGHT

Direct entry requires serious Italian readiness and competitive selection.

### FOUNDATION IS ENGLISH-TAUGHT

A structured bridge for science, academic study and life in Italy.

### INTERNATIONAL ROUTES NEED PLANNING

Diploma recognition, Universitaly, visa and arrival must move together.

| 6 YEARS | 192 | 60 FCC | ROME |
|---|---|---|---|
| MEDICINE & SURGERY · LM-41 | ROME MEDICINE SEATS · 2026/27 | ONE-YEAR FOUNDATION ROUTE | HISTORIC CAPITAL-CITY CAMPUS |

# A UNIVERSITY EXPERIENCE WITH A SENSE OF PLACE.

Casale San Pio V gives students something rare: a close university community inside one of Europe's most influential medical, cultural and international capitals.

## HISTORIC CHARACTER. MODERN AMBITION.

Link Campus University combines the atmosphere of a historic Roman estate with contemporary teaching facilities, collaborative learning spaces and an expanding medical-education route. The result is a campus that feels personal without separating students from the opportunities of a global capital.

For future doctors, Rome is more than a backdrop. It is a multilingual city, a major healthcare centre and a daily lesson in people, systems and culture.

### DISTINCTIVE CAMPUS

Study inside the historic Casale San Pio V complex, surrounded by courtyards, gardens and Roman architecture.

### CONNECTED COMMUNITY

A compact campus makes it easier to build relationships with classmates, lecturers and student services.

### INTERNATIONAL ROME

Live in a capital shaped by universities, hospitals, research organisations, embassies and global mobility.

| ONE CAMPUS | TWO ROUTES | EARLY SKILLS | GLOBAL CITY |
|---|---|---|---|
| STUDY, COMMUNITY AND SUPPORT | FOUNDATION OR DIRECT MEDICINE | SIMULATION AND PRACTICAL LEARNING | CULTURE, LANGUAGE AND OPPORTUNITY |

**"A medical education is not only what you study. It is where, how and with whom you learn to become a doctor."**

# A UNIVERSITY EXPERIENCE WITH A SENSE OF PLACE.

### ROME AS A CLASSROOM

Medicine is studied alongside the languages, people, institutions and public life of a European capital.

### A CAMPUS THAT FEELS PERSONAL

Historic spaces and a compact community create a distinctive setting for focused university life.

### AMBITION WITH DIRECTION

Choose a preparatory route or compete directly for the six-year degree with a clear admissions plan.

Images: Link Campus University · Programme details remain subject to official university regulations.

# YOUR CAMPUS BECOMES YOUR LEARNING ECOSYSTEM.

Move between historic spaces, collaborative rooms, digital facilities and a student community designed for focused university life.

**A LIBRARY WITH CHARACTER**
Long tables, traditional shelves and a setting built for concentrated study.

**COLLABORATIVE STUDY**
Spaces for peer learning, projects and academic preparation.

**DIGITAL FACILITIES**
Technology-supported learning inside the Rome campus.

**01 FOCUS**
Quiet academic spaces support the disciplined study required by medicine.

**02 BELONG**
A shared campus experience helps international students build community.

**03 CONNECT**
Digital tools and group learning connect theory with active preparation.

Images: Link International facilities and Link Campus University virtual tour. Verify commercial usage rights before publication.

# CHOOSE THE ENTRY POINT THAT FITS YOUR PROFILE.

Link Campus offers a preparatory route for students who need a stronger academic bridge and a direct degree route for candidates ready for competitive admission.

PREPARATION ROUTE

## FOUNDATION YEAR MEDICINE & HEALTHCARE

**€6,000** · one academic year

Build the science, academic and cultural foundation needed to begin university study in Italy with greater confidence.

- ✓ English-taught programme
- ✓ 60 FCC across six integrated modules
- ✓ Biology, Chemistry, Mathematics and Physics
- ✓ Academic Writing and Critical Thinking Labs
- ✓ Italian language and cultural adaptation
- ✓ Rome campus or online format

DEGREE ROUTE

## MEDICINE & SURGERY SINGLE-CYCLE LM-41

**6 YEARS** · 360 CFU

Progress from biomedical science to clinical reasoning, practical skills, supervised training and professional autonomy.

- ✓ Italian-taught degree and admission test
- ✓ Problem-Based and Team-Based Learning
- ✓ Skill Lab and simulation activities
- ✓ Clinical exposure grows from Year 3
- ✓ At least 75% attendance required
- ✓ 192 Rome places in the 2026/27 call

### FOUNDATION BUILDS READINESS

Ideal for B2 English students strengthening science, academic study and adaptation to Italy.

→

### MEDICINE REQUIRES SELECTION

Foundation completion does not guarantee admission. Candidates must satisfy eligibility and pass the official test.

Official sources: Link Campus Foundation Year and 2026/27 Medicine and Surgery Rome call.

# CHOOSE THE ENTRY POINT THAT FITS YOUR PROFILE.

**THE RIGHT ROUTE IS PERSONAL:** education length, diploma eligibility, Italian proficiency, science readiness, budget and timing should all be assessed before applying.

### CHOOSE FOUNDATION IF...

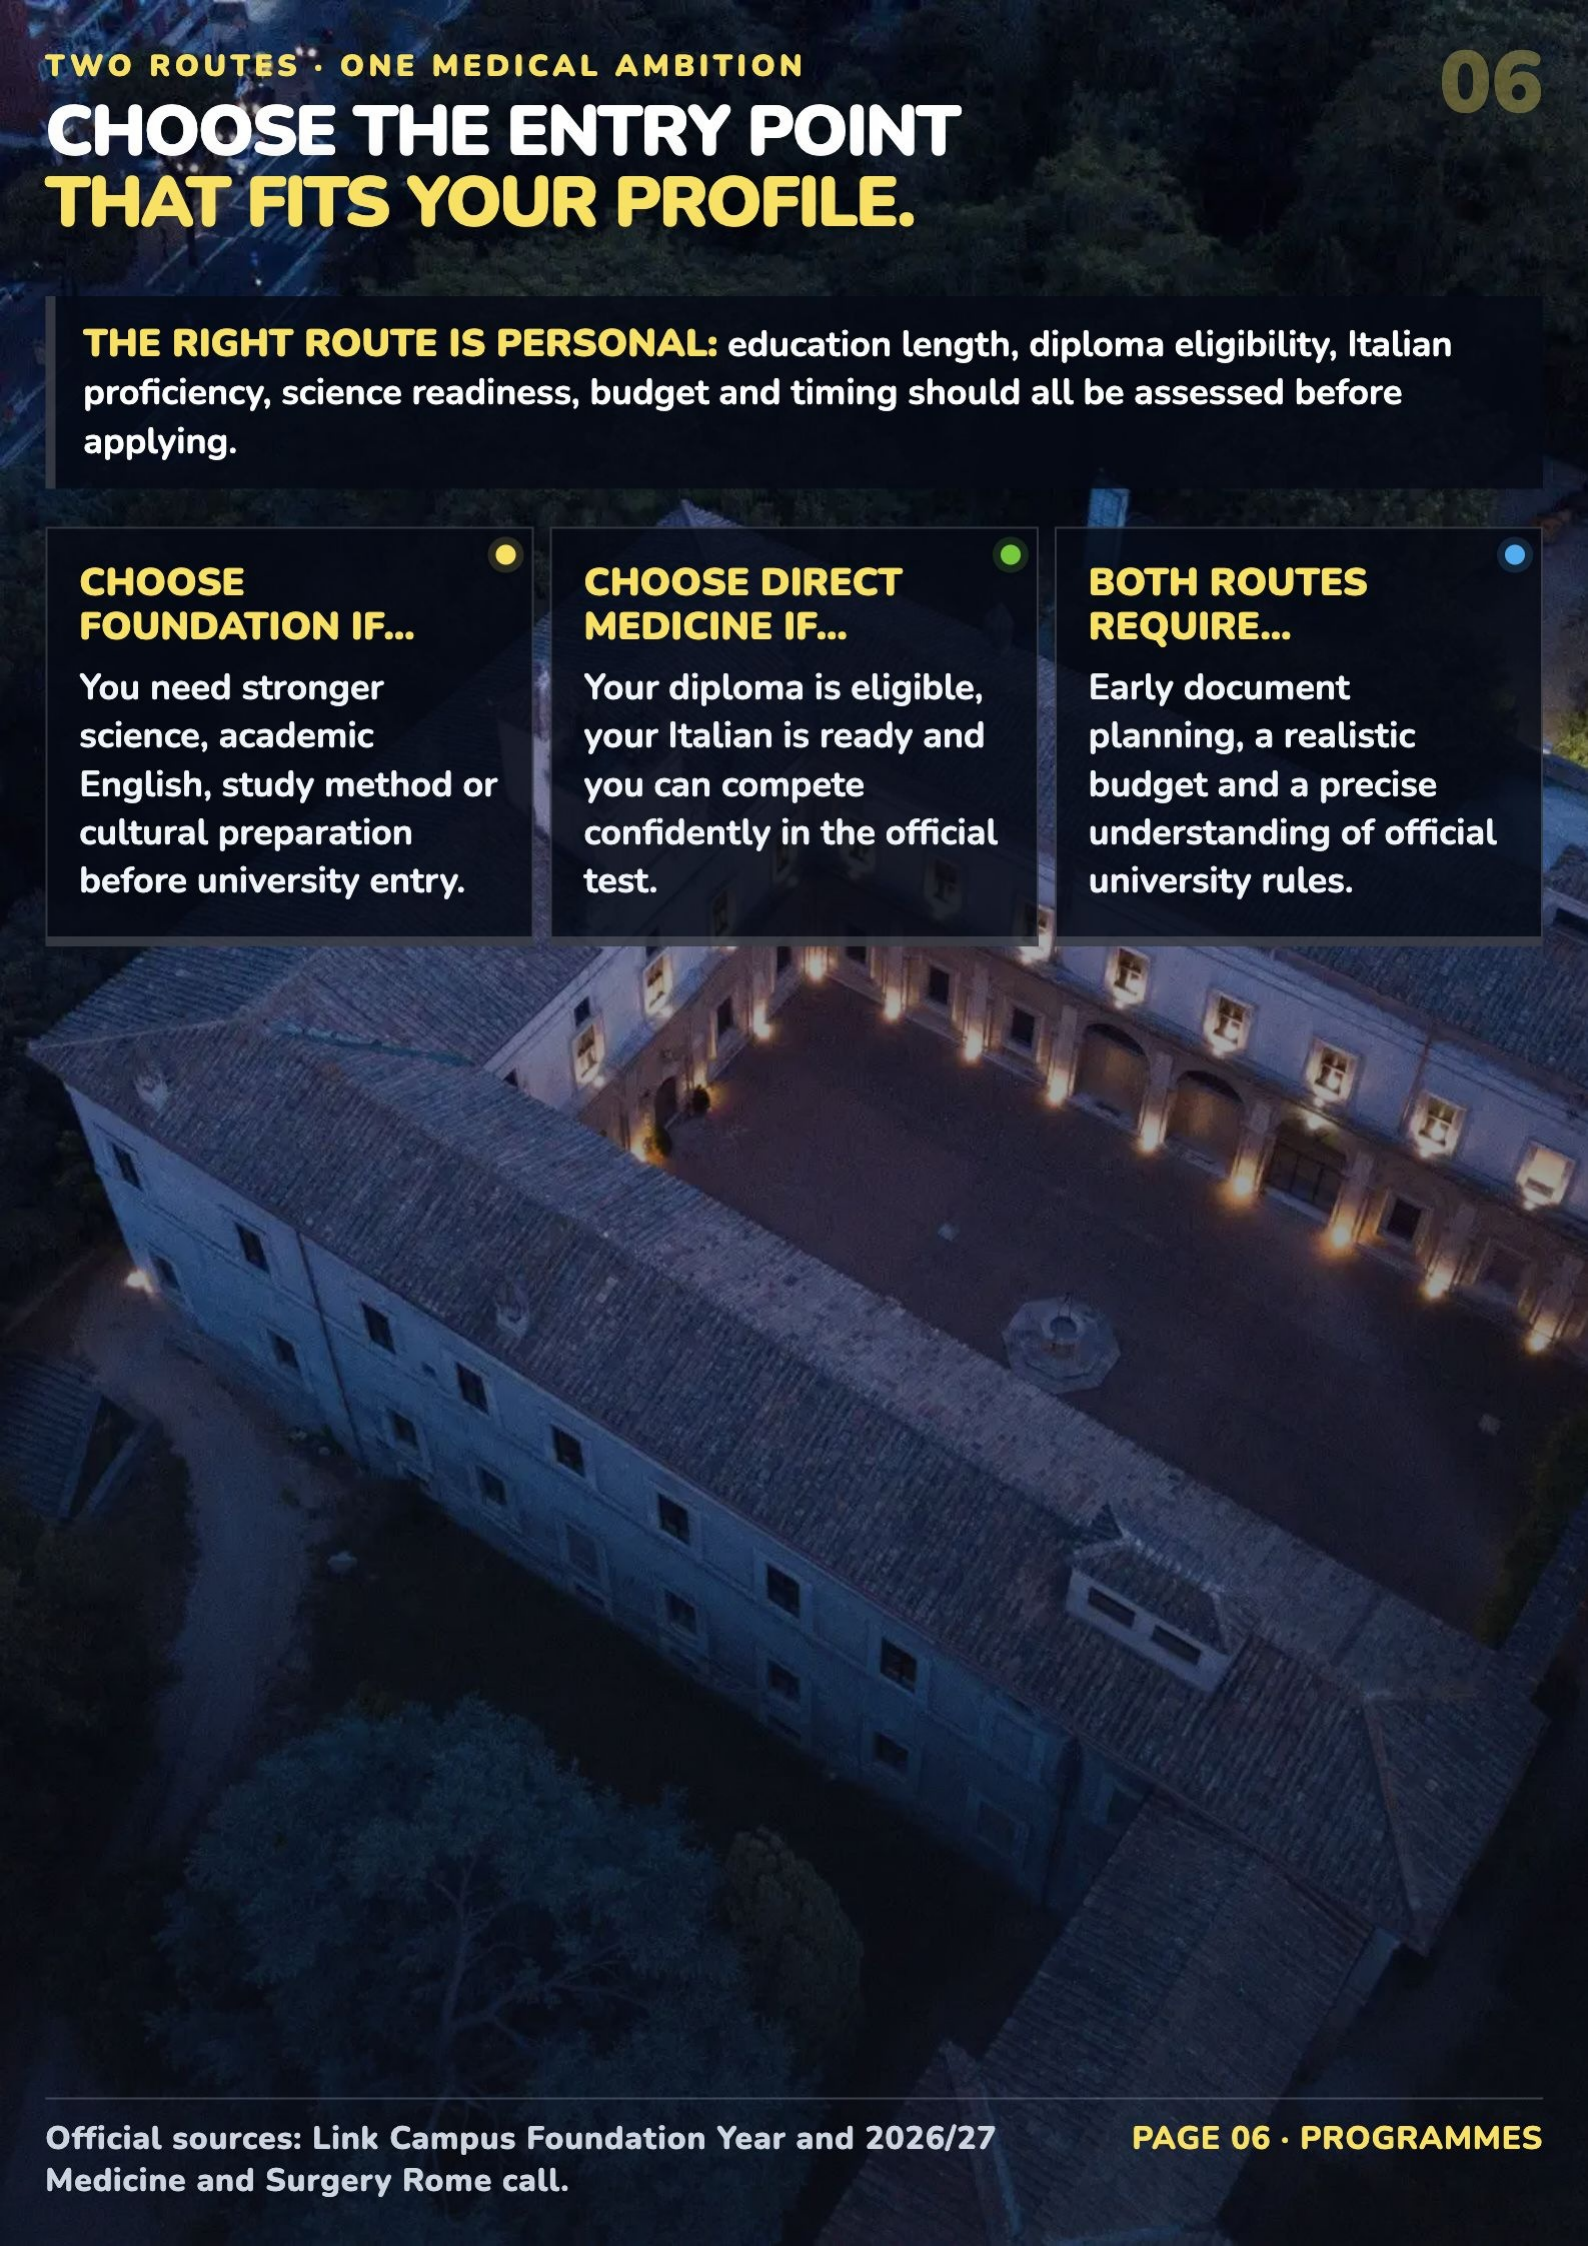

You need stronger science, academic English, study method or cultural preparation before university entry.

### CHOOSE DIRECT MEDICINE IF...

Your diploma is eligible, your Italian is ready and you can compete confidently in the official test.

### BOTH ROUTES REQUIRE...

Early document planning, a realistic budget and a precise understanding of official university rules.

Official sources: Link Campus Foundation Year and 2026/27 Medicine and Surgery Rome call.

# FROM FIRST PRINCIPLES TO CLINICAL JUDGEMENT.

The six-year pathway is designed to turn scientific knowledge into the reasoning, communication and practical skills required in patient care.

**PRACTICE BEFORE PRESSURE**
Clinical skills facilities connect anatomy and theory with examination technique.

PATIENT-CENTRED LEARNING

## KNOWLEDGE BECOMES A DECISION.

Link Campus describes a learning model that combines lectures with Problem-Based Learning, Team-Based Learning, flipped classrooms, role play, peer teaching and practical work. Students are expected to explain, apply and communicate-not simply memorise.

### SC… LA…

Bio… phy… ana…

### …ORMAL …NCTION 2

…ysiology, biochemistry, …netics and introductory …ical skills.

### UNDERSTAND DISEASE 3

Pathology, microbiology, pharmacology, diagnostics and early clerkships.

### SYSTEM-BASED CLINICS 4

Medical and surgical systems, oncology, imaging and clinical reasoning.

### PATIENT-CENTRED CARE 5

Major specialties, pediatrics, neuroscience, psychiatry and OB/GYN.

### INTEGRATION & AUTONOMY 6

Emergency care, advanced rotations, TPV, electives and thesis.

**THE OUTCOME:** a complete Italian single-cycle Medicine and Surgery degree. Always verify current accreditation, teaching sites, clinical network and year-by-year study plan in official documentation.

Images: Studenti.it and Brive. Curriculum labels are a concise guide; the official Study Plan controls.

# FROM FIRST PRINCIPLES TO CLINICAL JUDGEMENT.

### LEARN THE SCIENCE

Build a rigorous biomedical base and understand the mechanisms behind health and disease.

### PRACTISE THE SKILL

Use simulation, team learning and guided clinical activities to turn knowledge into action.

### GROW INTO THE ROLE

Progress toward clinical judgement, patient communication, professional responsibility and autonomy.

Images: Studenti.it and Brive. Curriculum labels are a concise guide; the official Study Plan controls.

# SEE THE WHOLE DEGREE. KNOW WHAT EACH YEAR BUILDS.

The curriculum moves from scientific language to supervised patient care, integrating biomedical knowledge, clinical reasoning, communication, professional responsibility and a final thesis.

**LEARN TO EXPLAIN**
Lectures are reinforced by active, discussion-led and team-based formats.

**INTEGRATED MEDICAL EDUCATION**

## FROM MOLECULES TO DECISIONS AT THE BEDSIDE.

Early years establish anatomy, histology, physiology, biochemistry, genetics and scientific method. The middle years connect mechanisms of disease with diagnostics and therapeutics. Later years deepen system-based care, rotations, emergency medicine and professional

### 1 ...ATIONS

...ical
...my,

### 2 FUNCTION & REGULATION

Physiology, biochemistry, genetics, immunology and the first structured clinical-skills activities.

### 3 MECHANISMS OF DISEASE

Pathology, microbiology, pharmacology, laboratory medicine, diagnostics and early clinical exposure.

### 4 SYSTEM-BASED MEDICINE

Cardiovascular, respiratory, digestive, renal and endocrine medicine, surgery, oncology and imaging.

### 5 COMPLEX PATIENT CARE

Neurology, psychiatry, pediatrics, OB/GYN, orthopaedics, specialties and patient-centred decision making.

### 6 INTEGRATION & AUTONOMY

Internal medicine, emergency care, advanced rotations, TPV qualifying activity, electives and thesis.

Curriculum is a reader-friendly map. Course names, credits, clinical sites and sequencing must be checked in the official Study Plan.

# SEE THE WHOLE DEGREE.
# KNOW WHAT EACH YEAR BUILDS.

| 360 CFU | ≥75% | YEAR 3+ | TPV |
|---|---|---|---|
| Single-cycle LM-41 degree | Attendance requirement stated by the university | Clinical exposure progressively increases | Practical evaluation integrated before graduation |

**SIMULATION**
Examination technique before real clinical pressure.

**PROFESSIONAL IDENTITY**
Knowledge, communication and responsibility grow together.

Curriculum is a reader-friendly map. Course names, credits, clinical sites and sequencing must be checked in the official Study Plan.

# A CLEAR ROUTE FROM APPLICATION TO SEAT.

The admissions process becomes less intimidating when every deadline, document and test decision is treated as one connected project.

**23 OCT** — 18:00

## APPLICATION & €200 TEST FEE

Complete the online Medicine application before the Italian-time deadline.

**26 OCT** — BY DATE

## FINAL VENUE NOTICE

Check the official university site for location and arrival instructions.

**29 OCT** — TEST DAY

## 60 QUESTIONS · 100 MINUTES

Italian-language multiple-choice selection with negative marking.

**04 NOV** — BY DATE

## MERIT RANKING

Ranking position and available capacity determine admission offers.

**16 NOV** — 18:00

## ENROLMENT DEADLINE

Admitted candidates complete payment and submit required documents.

### ADMISSION TEST

## 60 Q 100 MIN

Five options per question, one correct answer. Biology and Chemistry create the largest scoring opportunity.

| +1.5 CORRECT | -0.4 WRONG | 0 BLANK |
|---|---|---|

Dates shown: 2026/27 third call, test dated 29 October 2026. The official Italian call always prevails.

# A CLEAR ROUTE FROM APPLICATION TO SEAT.

## 01 ELIGIBILITY

Verify diploma validity, 12-year education requirements and any complementary credentials early.

## 02 DOCUMENTS

Prepare diploma, transcript, translation, legalisation, DOV/CIMEA and visa documentation.

## 03 PREPARATION

Build a science-led score plan, practise two-pass timing and respect negative marking.

### BEFORE YOU APPLY

Confirm eligibility, language level and every document that may require translation or legalisation.

### BEFORE TEST DAY

Prioritise Biology and Chemistry, practise timed decisions and control the cost of wrong answers.

### AFTER THE RANKING

Be ready to enrol, pay and submit documents quickly if your position receives an offer.

Dates shown: 2026/27 third call, test dated 29 October 2026. The official Italian call always prevails.

# ARRIVE READY.
# BUILD THE BASE TO PROGRESS.

Designed for students who need academic alignment, English-medium study skills or a stronger science foundation before entering a competitive degree pathway in Italy.

| 60 FCC | 6 × 10 | B2 | €6,000 |
|---|---|---|---|
| FULL ACADEMIC YEAR | SIX BALANCED MODULES | ENGLISH ENTRY LEVEL | CURRENT TUITION REFERENCE |

## ITALIAN LANGUAGE & CULTURE

Build daily confidence and prepare for academic and clinical life in Italy.

## MATHEMATICS & PHYSICS

Strengthen quantitative reasoning and the fundamentals used in selection tests.

## BIOLOGY

Consolidate cellular, genetic, physiological and organism-level concepts.

## CHEMISTRY

Develop reliable problem-solving across general and life-science chemistry.

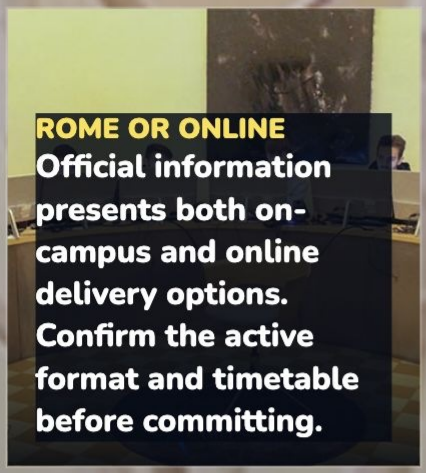

## ACADEMIC WRITING LAB

Practise structured, evidence-based communication for university assignments.

## CRITICAL THINKING LAB

Improve analysis, argument, interpretation and decision-making under pressure.

# ARRIVE READY.
# BUILD THE BASE TO PROGRESS.

**ROME OR ONLINE**
Official information presents both on-campus and online delivery options. Confirm the active format and timetable before committing.

**WHO IT CAN SERVE**

## NOT A WAITING YEAR-A YEAR WITH A JOB TO DO.

The strongest use of Foundation is intentional: close the 12-year-schooling gap where applicable, gain academic momentum and prepare for the next admissions cycle without losing sight of the final selection test.

- ✓ For applicants whose school pathway may not yet meet Italian entry rules.
- ✓ For students who need a structured science rebuild before Medicine.
- ✓ For international students adapting to study, language and life in Italy.
- ✓ For candidates who want guided preparation rather than an unstructured gap year.

**PROGRESSION IS NOT AUTOMATIC:** completing Foundation does not itself guarantee admission to Medicine, an EU/equiparato classification or a place in any later-year transfer. The applicable selection rules, immigration status and annual call must be checked for the individual applicant.

# FROM PORTAL TO ROME. CONTROL EVERY HAND-OFF.

Admission is only one part of the project. Account setup, recognition documents, Universitaly, visa timing and post-admission health requirements must move together.

### 01 REGISTER
Create the university account and complete Web Registration accurately.

### 02 ENTER THE PORTAL
Use the issued credentials and check every personal-data field.

### 03 SELECT THE TEST
Open the reserved area: Menu → Segreteria → Test di Ammissione.

### 04 UPLOAD & PAY
Submit the required files and the non-refundable €200 test fee.

### 05 TRACK THE CALL
Monitor venue, score, ranking and enrolment notices until completion.

**CORE DOCUMENT FILE**

## BUILD ONE VERIFIED DOSSIER

- ✓ Passport or valid identity document
- ✓ Final secondary-school diploma
- ✓ Complete academic transcript
- ✓ Official Italian translation and legalisation
- ✓ Dichiarazione di Valore where required
- ✓ Or CIMEA Verification + Comparability route
- ✓ Universitaly pre-enrolment record
- ✓ Visa, insurance and financial evidence

### VISA & UNIVERSITALY
University validation supports the process, but only the competent consulate decides the visa. Never treat pre-enrolment as a visa guarantee.

### OFA ACADEMIC OBLIGATIONS
A score below 50% in the science subject area may trigger additional learning obligations that must be recovered.

### HEALTH DOCUMENTS
Plan Mantoux/Quantiferon and Hepatitis B documentation within the university's stated post-enrolment window.

Use the university call, Universitaly and the competent Italian consulate as the controlling sources for your case.

# FROM PORTAL TO ROME. CONTROL EVERY HAND-OFF.

APPLICANT STRATEGY

## THE DETAILS CHANGE THE OUTCOME.

Citizenship, residence status, school history and document origin can change the correct route.

## WHAT MEDITALIANO HELPS YOU ORGANISE

Eligibility audit · document and recognition map · Universitaly and visa timeline · science-led test plan · housing, arrival and residence-permit preparation. The objective is a complete project, not a last-minute upload.

**TRANSFER IS A SEPARATE PROCEDURE:** applications to later years depend on the specific transfer call, available places and case-by-case credit recognition. Previous study does not create an automatic right to enter Year 2 or above.

Use the university call, Universitaly and the competent Italian consulate as the controlling sources for your case.

# PLAN THE DEGREE. PLAN THE LIFE AROUND IT.

A sustainable decision combines tuition, documentation, immigration and housing-not tuition alone.

**MEDICINE · FIRST YEAR**

## €20,050

Plus €16 stamp duty and €140 regional tax. The current call divides tuition into four scheduled payments.

| PAYMENT STAGE | AMOUNT |
|---|---|
| At enrolment | €5,200 + taxes |
| 31 December 2026 | €4,950 |
| 28 February 2027 | €4,950 |
| 30 April 2027 | €4,950 |
| Years 2-6 reference | €19,800 / year |

**FOUNDATION YEAR:** €6,000 for one year and 60 FCC. Confirm payment, cancellation and refund terms in the formal offer.

**ROME IS PART OF THE EDUCATION**

Build language, independence and cultural confidence while studying in an international capital.

01
### HOUSING

Budget deposit, agency fees, utilities and transport according to district and accommodation type.

02
### DOCUMENTS

Allow for translations, legalisation, DOV/CIMEA, visa, insurance and residence permit.

03
### DAILY LIFE

Balance campus access, language learning, clinical mobility and the cost of living in Rome.

Official source: 2026/27 Medicine Rome call, Article 9, and official Foundation Year information.

# PLAN THE DEGREE. PLAN THE LIFE AROUND IT.

**A six-year degree deserves a six-year financial plan-clear before enrolment, not after arrival.**

### ARRIVAL BUDGET

Plan deposits, travel, documents, insurance and the first months of living costs before departure.

### MONTHLY REALITY

Model housing, food, transport, study materials and personal costs with a sensible contingency.

### LONG-TERM VIEW

Review the complete six-year commitment, not only the first tuition payment or first semester.

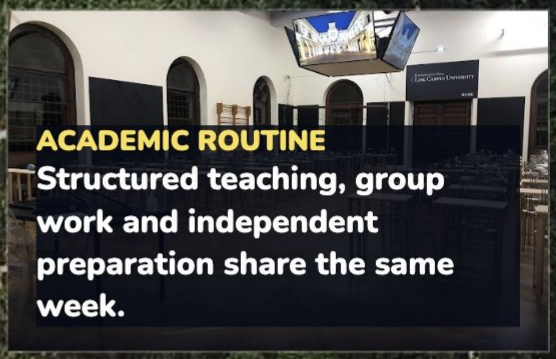

Official source: 2026/27 Medicine Rome call, Article 9, and official Foundation Year information.

# PICTURE THE WEEK. NOT ONLY THE DEGREE TITLE.

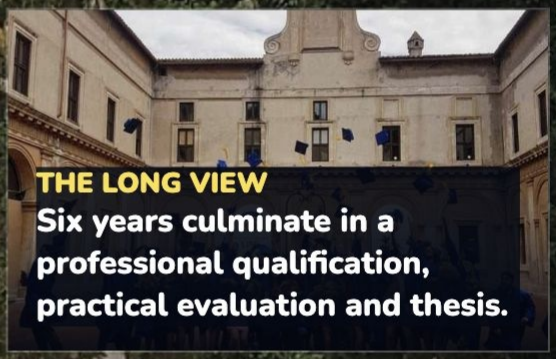

Medical school is experienced through lecture halls, focused study, practical rooms, clinical environments and the everyday logistics of building an independent life in Rome.

**CLINICAL CONTEXT**
Hospital exposure turns biomedical knowledge into observation, communication and supervised care.

**ACADEMIC ROUTINE**
Structured teaching, group work and independent preparation share the same week.

**THE LONG VIEW**
Six years culminate in a professional qualification, practical evaluation and thesis.

Images include Wikimedia Commons CC-licensed campus, surroundings and hospital references plus third-party campus photography.

# PICTURE THE WEEK. NOT ONLY THE DEGREE TITLE.

## STUDY SYSTEM

Protect daily review time, prepare for oral and written assessment, and use peer learning without outsourcing your own mastery.

## LANGUAGE PLAN

Foundation is English-taught, while the Medicine course and patient-facing environment require serious Italian development.

## ROME LOGISTICS

Choose housing by campus access, transport reliability and budget. Include deposits, utilities, insurance and document costs.

## CLINICAL READINESS

Vaccination and screening records, attendance discipline and professional conduct become operational requirements.

## FINANCIAL BUFFER

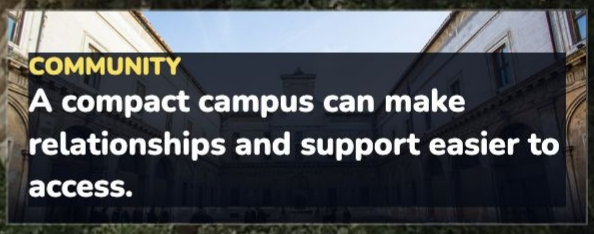

Build contingency into a six-year plan for rent changes, travel, equipment, translations and unexpected administrative costs.

## SUPPORT NETWORK

Plan who helps with university communication, immigration steps, housing issues and academic recovery before a crisis appears.

**GREEN ROME**
Historic gardens and residential neighbourhoods shape the campus setting.

**COMMUNITY**
A compact campus can make relationships and support easier to access.

**VERIFY THE CURRENT CLINICAL NETWORK:** hospital partners, rotation locations and year-by-year availability can change. Confirm the official Study Plan and active agreements before enrolment.

Images include Wikimedia Commons CC-licensed campus, surroundings and hospital references plus third-party campus photography.

# SEE THE CAMPUS. WITHOUT COVERING THE VIEW.

Large photographs and separate captions keep the university spaces visible while preserving the practical context applicants need.

## CASALE SAN PIO V

The historic courtyard gives the Rome campus a distinctive sense of place, combining traditional architecture with an active university environment.

## A COMPACT ROME CAMPUS

The aerial view shows the relationship between the historic complex, internal courtyards and surrounding green areas.

# SPACES DESIGNED FOR FOCUSED STUDY.

Applicants can picture daily academic life through the library, study rooms and collaborative facilities used across the campus.

## THE HISTORIC LIBRARY

Long study tables, traditional shelving and a quiet atmosphere create a memorable setting for individual preparation.

## COLLABORATIVE STUDY

Bright shared rooms support group work, peer explanation and the consistent study routine required for medical education.

# FROM KNOWLEDGE TO CLINICAL SKILLS.

The programme is built around scientific foundations, simulation, communication and progressive contact with clinical practice.

## SKILLS-BASED LEARNING

Clinical training facilities allow students to connect theory with examination techniques, patient interaction and professional habits.

## A CLINICAL NETWORK

Hospital partnerships and supervised placements are central to the transition from classroom learning to real patient care.

# ROME BECOMES PART OF THE DEGREE.

Campus life sits inside a capital city shaped by healthcare, culture, international mobility and a large student community.

## A CONNECTED COMMUNITY

A compact campus can make it easier to meet classmates, access support and build the relationships that sustain a demanding degree.

## KEEP THE LONG-TERM GOAL VISIBLE

The journey is demanding, but every stage - preparation, admission, study and clinical growth - points toward medical qualification.

# JOIN THE LINK CAMPUS WHATSAPP GROUP.
